Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Boyden (U.S. Patent Application Publication 2003/0036964).

Referring to claims 19-25. Boyden discloses a system comprising a server (Fig. 1, "102"); and at least one user computer, said at least one computer providing access to said system server (Fig. 1, "106"); and at least one auction computer (Fig. 1, "104").

Boyden further discloses a third party database (Fig. 4, "442"), said server communicating with said third party database

The Examiner notes, language that does not limit a claim to a particular structure does not limit the scope of a claim or claim limitation. USPTO personnel are to give claims their broadest reasonable interpretation in light of the supporting disclosure. In re Morris, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023, 1027-28 (Fed. Cir. 1997).

Response to Arguments

Applicant's arguments, filed 4/11/2007, with respect to the rejection of claims 1 and 3-18 under 35 U.S.C. 101 have been fully considered and are persuasive. The rejection has been vacated.

The applicant notes on page 8 of his response, "Claim 19 has been amended to substantially conform to a server and distributed network for performing the functionality of claim 1. Accordingly, Applicants submit that claim 19 for reasons stated in the parent application is allowable over the prior art."

The Examiner notes, the instant patent application does not claim priority (foreign or domestic) to a parent application.

The applicant attempted to amend claim 19 to conform to a server and distributed network for performing the functionality of claim 1.

The Examiner notes, the language of claim 19 does not limit the claim to a particular structure. The particulars of the data being sent and received by the system server do not structurally distinguish the claim from the prior art in terms of patentability.

As noted previously, Boyden discloses a system comprising a server (Fig. 1, "102"); and at least one user computer, said at least one computer providing access to said system server (Fig. 1, "106"); and at least one auction computer (Fig. 1, "104"). Boyden further discloses a third party database (Fig. 4, "442"), said server communicating with said third party database.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
